PROFESSIONAL SUMMARY

Results-driven Software Engineer with over 3 years of experience specializing in Laravel and full-stack development. Proficient in designing and developing scalable web applications, integrating APIs, and delivering solutions using Agile methodologies. Passionate about cloud computing and modern web technologies, with a strong background in Web Development. Seeking to leverage expertise in Laravel and cloud technologies in a dynamic environment.

Authorised to work in Australia with full working rights and do not require sponsorship.

TECHNICAL SKILLS

Programming Languages: PHP, Python, JavaScript, HTML, CSS, Java

Frameworks: Laravel, Flask, FastAPI

CMS: WordPress

DevOps: Git, CI/CD, RabbitMQ, Linux

Cloud: AWS EC2/S3

Database: MongoDB, MySQL, SQL Server

EXPERIENCE

CureMD – Lahore, Pakistan

Software Engineer, Scrum Master

May 2021 – May 2023

- Designed and developed Laravel-based and Python-based web applications using frameworks like Flask and FastAPI, following clean code principles and industry best practices.
- Developed and integrated RESTful APIs to enable seamless communication between frontend and backend services.
- Designed and implemented microservices architecture, enhancing modularity, scalability, and deployment efficiency.
- Integrated various third-party APIs (e.g., Codility, SSO, authentication services) to expand application functionality.
- Utilized RabbitMQ as a message broker for event-driven microservice communication.
- Debugged and resolved software issues, collaborating with QA engineers, product managers, and cross-functional teams.
- Led development of critical internal tools.
- Facilitated Agile practices as a Scrum Master (CSM), leading sprint planning, daily stand-ups, and retrospectives.

Onyxtec – Lahore, Pakistan

Software engineer

Feb 2021 – May 2021

- Created and maintained comprehensive technical, functional, and test documentation for backend services and workflows.
- Participated in code reviews and applied feedback to improve system performance and maintainability.
- Performed data management tasks including import/export operations and improving data quality using Python/PHP and SQL.
- Collaborated across departments to ensure on-time project delivery in dynamic, fast-paced environments.

EDUCATION

University of Wollongong – Wollongong, Australia

June 2025

Master of Information Technology, Information System Development: WAM: 80.71%

University of Lahore – Lahore, Pakistan

August 2019

Bachelor of Science, Software Engineering; Cumulative GPA: 3.6/4.0

PROJECTS

Privacy-Preserving Password Manager (Capstone, 2025)

Python, Flask, FastAPI, OpenMined library, PSI, Bloom Filters

Developed a secure password manager using Private Set Intersection (PSI) to match credentials without revealing them. Implemented cryptographic techniques (DDH) and REST APIs for privacy-preserving login.

Doctor Appointment System (AWS Hosted, 2025)

PHP, MySQL, AWS EC2/S3

Designed a multi-role web portal with appointment booking and calendar integration. Deployed system on AWS with role-based access and cloud file handling.

Aspect-Based Sentiment Analysis (IMDB Reviews, 2024)

Python, Scikit-learn, NLP

Built an ML pipeline to classify sentiment tied to specific review aspects. Applied text preprocessing, feature engineering, and model training for targeted sentiment extraction.

Shift Grabber (Personal project, 2024)

PHP, Restful APIs, Cron Jobs, MITM tool

Implemented automated shift booking via PHP scripts and cron jobs, streamlining real-time slot acquisition from third-party platforms.

Applicant Tracking System (CureMD, 2023)

Laravel, MySQL, MongoDB, Azure DevOps, RabbitMQ, Restful APIs integration, GitHub, ajax

Led development of a custom ATS with integrated Codility & Criteria APIs. Streamlined hiring via automated assessments and CI/CD pipelines.

CERTIFICATIONS

Certified Scrum Master (Scrum Alliance, 2023)

AWS Cloud Foundations (AWS, 2024)
